

Wilmington Nov. 16th 1876
My Dear Mr. Gray

The drawings are
all right and are beautifully
executed.

I hope to go to Phila. to-
morrow & will make inquiries in
regard to the matter.

If though, they can be as
well done in Boston, it strikes
me that is the place to have it
done. I will cheerfully bear the
expense.

You will have the dis-
cuss estimate and can inform
me and I will report to you
after I find out about things
in Phila.

Thanks for information

stand for a week or two days.

But we went South soon after. Ball asking how I should
send the first series, but I do
not hear from him. I have now
ready to send the Palmer collection, and
about 400 species California plants,
* and in addition nearly 1000
do species.

Yours truly
J. M. Coulter

* Also a good many Guadalupe Island
plants.
